**AFFIDAVIT OF MICHAEL CHARLES DUFFY, M.D., F.A.C.G.**

STATE OF MICHIGAN )

) SS

COUNTY OF Oakland )

I, Michael Duffy, M.D., F.A.C.G., being first duly sworn, deposes and states:

1. My name is Dr. Michael Duffy, M.D. I have been board certified in internal medicine since 1978 with a subspecialty board certification in gastroenterology since 1981.
2. I have been a licensed physician for over forty-seven (47) years, having obtained licenses in Louisiana, Connecticut, and Michigan. I have been an attending physician at Beaumont Hospital since 1988. I presently work in Beaumont Hospital's Division of Gastroenterology-Hepatology, and I also see patients in my private gastroenterology medical practice. I have been an associate clinical professor of medicine at Oakland University William Beaumont Hospital School of Medicine since 2010. A copy of my curriculum vitae is attached.
3. I have extensive experience with the medical conditions involved in Mr. Andrew Lyles' care and/or those alleged in the plaintiff's Complaint, including but not limited to ulcerative colitis, lower abdominal pain, diarrhea, colonoscopies, fecal occult blood tests (FOBTs), rectal bleeding, constipation, and the care, treatment, and causes associated with said conditions.
4. I have been provided with, and have reviewed, the Complaint and medical records pertaining to the plaintiff, Andrew Lyles.
5. Based upon the medical records, I believe that appropriate treatment was instituted by Dr. Papendick and Dr. Oliver for Mr. Lyles' complaints and symptoms, which were reported in November 2016. In my opinion, the

defendants appropriately evaluated his symptoms, properly investigated his symptoms, prescribed the appropriate courses of treatment, including treating him for constipation, ordering medications, x-rays, and FOBTs, and investigating more common causes for his symptoms prior to ordering a colonoscopy.

6. The assessment, diagnoses, and treatment of Mr. Lyles' complaints and symptoms involved the exercise of medical judgment by the defendants, Dr. Papendick and Dr. Oliver. In my opinion, based upon the facts and evidence surrounding Mr. Lyles' medical course, Dr. Papendick and Dr. Oliver both exercised proper medical judgment at all times during their involvement in Mr. Lyles' care.
7. Ultimately, Mr. Lyles was hospitalized from August 3, 2017 to August 16, 2017 and was diagnosed with severe ulcerative colitis.
8. Mr. Lyles' initial symptoms were nonspecific, did not fit a single diagnostic, did not suggest ulcerative colitis, and were common with other medical conditions. A diagnosis of ulcerative colitis is often a difficult diagnosis to make, and it takes time before such a diagnosis is made. In this case, Mr. Lyles' initial course of treatment from 2017 to 2018 by Dr. Papendick and Dr. Oliver was appropriate.
9. In my opinion, Mr. Lyles' medical course that occurred prior to him ultimately being diagnosed with ulcerative colitis does not constitute any unreasonable delay and is justified by the nature of his presenting symptoms, including some

symptoms which improved. The time frame in which Mr. Lyles was diagnosed with ulcerative colitis did not have any major impact on the ultimate course of his disease. He was ultimately treated with Infliximab and Balsalazide and seemed to respond. He eventually was switched from Infliximab to Humira, but because of continued colitis refractory to medical treatment, he failed treatment and ultimately underwent a total abdominal colectomy in December of 2019.

10. I do not agree with the argument that an earlier diagnosis should have been made.

More likely than not, and within a reasonable degree of medical certainty, any earlier diagnosis and treatment in 2017 would not have prevented Mr. Lyles' ultimate need for surgery. A certain percentage of patients with ulcerative colitis will require surgery despite our advances in medical therapy.

11. Any alleged delay in diagnosis and treatment did not increase Mr. Lyles' risk for colon cancer. Ulcerative colitis is a chronic condition of unknown cause characterized by periods of remission and exacerbation. There is no known means to prevent the onset of this disease.

12. Mr. Lyles did not suffer any medical damages from any alleged actions or inactions by Dr. Papendick or Dr. Oliver.

13. The statements made in this affidavit are true and accurate to the best of my current knowledge, information, and belief.

Dated:

11-9-, 2021

Michael Duffy  
Michael Duffy, M.D., F.A.C.G.

Subscribed and sworn to before me this

9<sup>th</sup> day of November 2021.
